Benefits of Membership

- *Exclusive Resources*
- *Mathematical Expertise*
- *Supportive Network of Over 80,000 Members*
- Member-only Online Teaching Resources
- Special Offers on Insurance Plans
- Professional Development opportunities
- Conferences with fellow teachers
- ...And More!

Information Accessible to Non-members:

Standards & Focal Points
Conference
Professional Development
Mathematics Jobs Online
Mathematics Homework Help

Food for Thought

"Pure mathematics is the world's best game. It is more absorbing than chess, more of a gamble than poker, and lasts longer than Monopoly. It's free. It can be played anywhere - Archimedes did it in a bathtub."

-Richard J. Trudeau

"Not everything that can be counted counts, and not everything that counts can be counted."

-Albert Einstein

Tennessee Mathematics Teacher Association, TMTA

TMTA dues are \$10 for one year (\$25 for three years) and include a subscription to the TMTA bulletin. TMTA holds math contest each year in several different math disciplines. TMTA offers scholarships to students who are committed to teaching mathematics in Tennessee at either the secondary or elementary level.

Impression of Website

Overall the websites are straightforward to navigate through with an abundance of information to share with members. Non-members do not have the same navigation capabilities through the websites as members, so it is worth the membership price to receive the full experience of the NCTM and TMTA. From going through the websites, they seem to have a lot of things for students and teachers alike. These sites are great for people who may be apprehensive about teaching mathematics, and has tons of ways to better every classroom teacher.
